

CLASS V
GENERAL SCIENCE

Lesson-7

A.1) microorganism 2) photosynthesis 3) poaching 4) food chain
5) consumers

B.1) Herbivores 2) Carnivores 3) Scavengers 4) Pollution 5) Poaching
5) Deforestation

C.1) Lion, Tiger 2) Bears, Raccoon 3) Vulture, Hyena 4) Bacteria, Fungi
5) Deer, Goat

II.

Ans-1) Some living organisms in our environment that are not visible to the naked eyes are called microorganisms.

Ans-2) The process in which plants use sunlight to convert water and carbon dioxide into food in the presence of chlorophyll is known as photosynthesis.

Ans-3) Scavengers are animals that feed on dead plants and animals which decomposes are small organisms that breakdown dead and decaying organisms and decomposed them.

Ans-4) Food chain is a kind of chain where energy flows from the sun to the plants and then to animals in the form of food.

Ans-5) Forest fires are caused naturally by volcanoes or lightning strikes and also by human activities.

Ans-6) Deforestation is the cleaning of forest areas to create cities, towns and factories.

Ans-7) The practise of illegal hunting or killing of animals is called poaching.

PAGE-89 True or False

1) True 2) False 3) True 4) True 5) False 6) False

PAGE-92 Fill in the blanks

1) plants, photosynthesis 2) energy, starch 3) food chain 4) deforestation
5) pollution
